Pamela Teaster, PhD, doesn’t usually give much thought to typhoid fever while sitting in her office in the Charles T. Wethington Jr. Building on Rose and South Limestone streets. The water in this building, which houses the College of Health Sciences, offices and laboratories, is fine, thank you very much.

Teaster, a professor, associate dean for research for UK’s College of Public Health and director of the Graduate Center for Gerontology, however, was recently prompted by a Kentucky Clinic South physician to consider the possibility of contracting typhoid, encephalitis and rabies. That was because of Teaster’s planned travel to China to adopt a daughter, Hadley Ning Teaster, 2 1/2.

Teaster made an appointment with the clinic’s Scott Prince, MD, MSPH, whose specialties include travel medicine. In addition to identifying required immunizations, Teaster was briefed on what other conditions she might develop in China’s Guanxi Province.

‘The Healthy Journeys program helped me understand how to care for myself on the trip.’

— Pamela Teaster, PhD, UK College of Public Health

The clinic’s preventive travel medicine program is available for business, leisure and social services travel, such as volunteerism. Called Healthy Journeys, the program involves more than merely providing the required immunizations for the nation of entry. It also alerts people about health conditions that may be avoided with information or medications, such as traveler’s diarrhea, jet lag and malaria. Healthy Journeys can also review the traveler’s overseas health insurance and assess its adequacy.

After a six-year adoption wait, Teaster and her husband, Gerald, received word the process had been approved. Plans were laid for the trip, including a health consultation and immunizations. Healthy Journeys provided continued on page 3
Birdwhistell named associate VP, marketing and external affairs

Mark D. Birdwhistell has been named associate vice president for marketing and external affairs. He will continue to serve as chief of staff for the Office of the Executive Vice President for Health Affairs.

In this new role, Birdwhistell will oversee the coordination of marketing and public relation efforts with UK HealthCare's strategic plan. He will provide strategic direction for marketing priorities from an enterprise level.

Birdwhistell will continue to oversee regulatory affairs and analyze the impact of changes in Medicare and Medicaid as well as the implications of health care reform on UK HealthCare.

Birdwhistell has been with UK HealthCare since 1994. In late 2007, he returned to UK after serving as Secretary of the Kentucky Cabinet for Health and Family Services. Prior to that, Birdwhistell served as chief executive officer for CHA Health, overseeing the health plan's successful return to financial solvency.

Sampson named director of community-based practices

John Sampson has joined Ambulatory Services as director of community-based practices for UK HealthCare. For the past three years, Sampson has been a member of the Ambulatory Services leadership team and has worked directly with department chairs, faculty, practice managers and administrators to address human resource issues to improve clinical operations. Specifically, he has been involved with health care projects related to quality and safety improvement, patient and employee satisfaction, faculty recruitment, practice acquisition, accreditation, policy development and compliance.

Sampson, who has more than 16 years of experience as a human resources professional, has worked exclusively within UK HealthCare since 2002. He earned a bachelor's degree from Union College and is a certified senior professional in Human Resources. In his HR role in the College of Medicine, Sampson provided support to department chairs, faculty, staff and administration while also overseeing the university's workers compensation and long-term disability programs.

In this newly created position, Sampson will provide administrative leadership for the multiple clinical practices based outside Lexington. The growth of these practices continues to surge as they help support UK HealthCare’s strategic priority of the growth of these practices continues to surge as they help support UK HealthCare’s strategic priority of Kentucky.

UKHC Employee Advisory Council
Thursday, Sept. 15
11:30 a.m.-1 p.m. Open to members and guest presenters only. To be a presenter, call 859-257-5361.

Free prostate screenings
Wednesday, Sept. 21
4:30-7:30 p.m., Markey Cancer Center. The screenings are for men who haven't been screened for prostate cancer within the past two years. The screenings are for all men ages 40-75 and for minority men, or men with a family history of prostate cancer, who are age 35 or older. Enrollment is limited; for an appointment, call toll-free 866-340-4488 or 859-257-4488.

Fourth Annual Stroke Fair
Friday, Sept. 23
9 a.m.-4 p.m., North Lobby and Courtyard, Pavilion H, Chandler Hospital. Sponsored by the UK HealthCare Comprehensive Stroke Program, the event will feature educational booths, games, door prizes and food.
Nineteen practice managers from Ambulatory Services clinics were recognized at a June 23 luncheon at the Hilary J. Boone Center for completing the inaugural Operations Manager University. Richard Lofgren, MD, vice president for healthcare operations, spoke to the group about the importance of the ambulatory clinics to the UK HealthCare enterprise.

Jonathan Curtright, chief operating officer for ambulatory services, sponsored the program in which managers met monthly for almost a year to build knowledge and skills in areas such as team development, process improvement and matrix management. UK HealthCare administrators led the workshops, which will start again this fall as the Practice Managers University.

"In the employee-engagement survey, these managers told us they needed more training and guidance," Curtright said. "We started this program as a response to their feedback. The demands on our practice managers are increasing. We needed to give them the tools to meet those demands."

Graduates included Angie Bowen, Rheumatology; Angela Dalton-Tibbetts, Ophthalmology & Visual Sciences; Rhonda Gillam, Markey Outpatient Clinic; Lisa Hatton, Radiation Medicine; Gary Hibbitts, Radiology; Crystal Kendrick, Comprehensive Breast Care Center; Jami Kyle, Cardiology-Gill Heart Institute; Lindsay Marshall and Leslie Young, Ambulatory Services; Cathy Bishop, Paris Hager, Greg Rose and Christine Martin, Orthopaedic Surgery & Sports Medicine; Blake Mills, Internal Medicine; Meagan Parker and Kathy Poteet, Internal Medicine & Pediatrics Group; Cheryl Roberts, Good Samaritan-Orthopaedic Surgery; Tracy Steele, Occupational & Physical Therapy; and Amy Wright, Transplant Surgery.

Markey Cancer Center partners with hospital in India

Markey Cancer Center has formed an international partnership with Kailash Cancer Hospital in Waghodia, Baroda, India. The relationship was made official May 5 at a "sister center" signing ceremony at UK. Representatives from both institutions signed a memorandum of understanding outlining plans for cooperative initiatives in cancer prevention and treatment, research collaboration, and personnel exchanges for training and education.

Yogendra Shah, MD, and Vikram Patel, MD, represented Kailash Cancer Hospital. Markey was represented by Director Mark Evers, MD, and Vivek Rangnekar, one of Markey’s prominent cancer researchers. Rangnekar, a professor in microbiology, immunology and molecular genetics, played a leading role in bringing the two centers together. "This international collaboration between the Markey Cancer Center and Kailash Cancer Center is a new milestone that will facilitate the exchange of educational, scientific and clinical expertise in oncology," Rangnekar said. "Such an exchange is expected to provide a greatly enriching professional experience and a synergistic outcome at the participating institutions. Over the years, it will lead to new discoveries and approaches for prevention, diagnosis and treatment of cancer."

Evers said Markey and its Indian sister center are similar in many ways. "We see similar types of patients, and we see some of the same challenges that our colleagues at Kailash do," he said. "They are in a largely rural area, and smoking is a major challenge for them, as it is for us here."

Kailash Cancer Hospital is Markey’s second international sister center. Shanghai First People’s Hospital Comprehensive Cancer Center in China became Markey’s first sister center in April 2010.

Kentucky Clinic South

continued from page 1

this, and Teaster was also counseled by Dr. Prince on what over-the-counter medications she would be permitted to carry.

“The Healthy Journeys program helped me understand how to care for myself on the trip. It helped me know what to pass along to my fellow traveler, a friend who works at a public health department in Virginia. And, of course, it helped me understand the medical hand-off between the international adoption clinic we’d been working with, and my new daughter’s entry into the American health care system,” Teaster said.

Mother and daughter met for the first time on July 25, and both are doing well.
The Employee Service Awards brunch on June 10 at the Lexington Center recognized more than 600 individuals who have reached service anniversaries of five, 10, 15, 20, 25, 30, 35 and 40 years. For the first time, recipients from UK HealthCare and the College of Medicine were honored in a combined celebration.

Employees with 20 or more years of service include:

Relay for Life team raises $2,998

The Markey Cancer Center/Kentucky Medical Services Foundation Relay for Life team raised $2,998 for the American Cancer Society’s signature event in June. The funds support programs, including the Patient Navigator Program, that directly benefit Markey patients.

During the overnight relay participants celebrate those who have survived cancer and remember those who have died.

Led by first-time captain Alicia Baker, the team solicited donations, held raffles and sold official UK Relay for Life T-shirts.

“The Relay for Life is something very dear to my heart,” Baker said. “I will continue to support this event for years to come.”

Keeneland Concours d’Elegance benefits KCH

The eighth annual Keeneland Concours d’Elegance classic car show on July 16 at Keeneland Race Course benefited Kentucky Children’s Hospital (KCH). Through the years, the event has raised almost $500,000 for newborn research.

“As we have for the last seven years, we are so pleased to be able to bring this event to the Bluegrass and support the physicians and researchers at Kentucky Children’s Hospital in providing the best care possible for our Kentucky children,” said Connie Jones, event co-chair.

In 2006, the Keeneland Concours organizers created an endowment at KCH for newborn research. With matched funds from the state, the endowment gift totals $400,000.

Some of the endowment research looks at brain hemorrhages, respiratory problems, chronic lung disease, and natural maturation of the rhythm of sucking, swallowing and breathing in premature infants with lung problems.

This year’s event featured the Italian Alfa Romeo and the Alfa Owners Club National Convention, offering thousands of car enthusiasts from across the nation the opportunity to enjoy these exotic and classic automobiles as well as many automotive special displays, hundreds of cars in the car club paddock, silent auction, automotive art and a day that showcased “all things Kentucky.”

Christina Yue of Development is one of 13 UK employees who volunteered during the Habitat for Humanity Good Health Build supported by UK HealthCare. A green-certified home is being built in Lexington for Good Samaritan Hospital employee Eugenia Barrera and her three children. UK HealthCare is providing financial support for the project, in addition to recruiting volunteer workers and providing lunch and water on several days. Construction, which began June 21, is expected to take eight to 10 weeks.

Stitches, the Kentucky Children’s Hospital (KCH) mascot, posed with swimmer Isabella Cusic at the 2011 Man o’ War Swim Conference July 9-10 at the Waterford neighborhood pool in Lexington. KCH sponsored the event, which involved 1,200 swimmers ages 5-18. UK HealthCare representatives handed out backpacks and literature and the SafeKids program distributed safety whistles.

## Weaver receives national nursing excellence award

Diana J. Weaver, senior nursing advisor at UK HealthCare, has been selected to receive the prestigious Daniel J. Pesut Spirit of Renewal Award for Nursing Excellence by the Sigma Theta Tau International (STTI) Honor Society of Nursing. She will receive the award during the STTI Biennial Convention in Grapevine, Texas, in October.

The award recognizes a nurse leader who exemplifies purposeful reflection in practice, mindful understanding of human interrelationships and displays an appreciative, futuristic vision of the practice of nursing. Only one nurse leader is bestowed the prestigious Spirit of Renewal Award by Sigma Theta Tau biennially.

## Recognition

The UK HealthCare team participated in the Stop Diabetes Tour de Cure event in Prospect on May 21, riding distances ranging from 20 to 60 miles. Eight team members completed the 60-mile route. The UK team raised $1,886 of the $65,749 total. Pictured standing from left: Chrisi Karounos, Dennis Karounos, Joel Thompson, Christopher Karounos, Nicholas Hatch and Kevin Anderson; kneeling from left: Kelly Putnam, Michael Karounos and Jessica Brock. Not pictured: Fran Bevins and Estill Robinson. The team also participated in the Step Out to Stop Diabetes event June 4 at Keeneland Race Course.

Environmental Services employees Norman Caldwell, far left, and Tonya Wilson, second from right, were recognized by Colleen Swartz, chief nurse executive, second from left, and Paul DePriest, MD, chief medical officer, far right, for their outstanding quality efforts and delivering exceptional service to the patients and staff of Kentucky Children’s Hospital and women’s care services.
Mark Kleinman, MD, assistant professor and researcher in Ophthalmology and Visual Sciences in the College of Medicine, is one of two junior faculty clinician-scientists to receive the Foundation Fighting Blindness Career Development Award in fiscal year 2011. The award is given to “jump-start” the careers of highly-qualified junior investigators to pursue vigorous research programs to drive the research to find therapies and cures for retinal degenerative diseases. The award is given in five annual payments of $75,000 for a total of $375,000.

After completing his medical degree and a surgery internship at New York University, Dr. Kleinman came to UK in 2006 for his residency in Ophthalmology and Visual Sciences (which he completed in 2011) and to join Dr. Jayakrishna Ambati’s laboratory as a postdoctoral scholar. His research interests focus on defining the molecular interface of angiogenic mediators and the biologic spectrum of immune-related inflammation.

Dr. Kleinman’s research will utilize next-generation sequencing to delve into the disease mechanisms that cause age-related macular degeneration (AMD), a common cause of vision loss.

### PERSONNEL BRIEFS

#### Lara Blake, RN, BSN

Blake, RN, BSN, has been named Main Operating Room (MOR) service line manager for plastic, oral-maxillofacial, dental, ophthalmology, lasers, and ear, nose and throat surgery. Blake, who has more than 29 years of nursing experience, began her nursing career at UK in obstetrics and later moved to perioperative services. She also worked for Kentucky Organ Donor Affiliates for six years. Most recently, Blake was the education, quality assurance and safety coordinator for the UK Center for Advanced Surgery.

#### Joseph Brown, MD

Brown, MD, Internal Medicine-Pediatrics, was named Resident of the Month for August. Dr. Brown was nominated by several people who noted he takes a high amount of personal responsibility with his patients, strives to read and understand all the complexities of their medical issues, and explains information. He teaches medical students constantly, is an enthusiastic worker and is always willing to help others.

#### Jason Buseman, MD

Buseman, MD, plastic surgery, was honored as Resident of the Month in July. Dr. Buseman was nominated by several people who noted he is an outstanding patient advocate with an excellent bedside manner. Cited specifically was his ability in talking with post-op patients and their families. In addition to his commitment to patient satisfaction, Dr. Buseman is a team player who works well with others.

#### Susan Dunlap

Dunlap has been named internal communications manager for UK HealthCare. She is responsible for the Vital Signs and In the Loop employee publications and coordination of the UK HealthCare Employee Advisory Council. Dunlap has more than two decades of media and corporate communications experience, including stints with Humana Inc. and Lexmark International. Dunlap is working toward her PhD with a gerontology concentration in UK’s College of Public Health.

#### Patti Robbins, RN, BSN

Robbins, RN, BSN, has been named Main Operating Room (MOR) service line manager for urology, gynecology, general and pediatric surgery. Robbins, who has more than 10 years of nursing experience, began her nursing career at Ephraim McDowell Medical Center in the ICU and later moved to perioperative services. She joined Samaritan perioperative services in 2007. Most recently, Robbins was urology line coordinator and laser safety officer for Good Samaritan.

#### Stephanie Sutphin

Sutphin, a hematologist/oncologist pharmacy specialist at UK HealthCare and an assistant professor in the College of Pharmacy, was named the Leukemia & Lymphoma Society’s (LLS) local Woman of the Year on June 17. During a 10-week period, Sutphin and nine other candidates raised more than $132,000 to help LLS fund research for cures and better therapies and provide information and support for blood cancer patients and their families, with Sutphin’s efforts contributing $21,388.

#### Dianne Whitaker, RN, MSN

Whitaker, RN, MSN, has joined Nurse Recruitment to recruit personnel for Good Samaritan Hospital, Kentucky Children’s Hospital, Maternal Care and the per diem pool. Whitaker received a BSN and MSN from the UK College of Nursing. She has had extensive RN work experience at the Veterans Administration Hospital and most recently at Bluegrass Mental Health-Mental Retardation Board. Whitaker has more than 13 years of experience as a nurse recruiter and resource manager, with a primary focus on nurse-retention initiatives.
Employee/Student Appreciation Day, Sept. 15

Food, games, prizes and plenty of fun will be featured at the UK HealthCare Annual Employee/Student Appreciation Day picnic in September. The festivities will be held in the Dentistry Courtyard between Pavilion H and Markey Cancer Center.

The picnic for night shift employees will be 11:30 p.m. Wednesday, Sept. 14, until 2:30 a.m. Thursday, Sept. 15.

The picnic for day shift employees will be 10:30 a.m.-6 p.m. Thursday, Sept. 15.

Proceeds from the dunking booth and gift basket auction will benefit the United Way Human Needs Fund.

Box lunches will be delivered to employees who are unable to leave their stations or floors.

A single electronic medical record is coming to UK HealthCare

When Congress made use of electronic medical records (EMRs) all but mandatory in 2009, UK HealthCare was already laying a foundation for this information technology. EMRs will support the efficient capture of health information, drug prescribing, communication for care coordination, and ability to report clinical quality measures and public health information.

A $60+ million cornerstone endeavor called projectONE places UK HealthCare on a superhighway of creating a single patient EMR for every person who visits any of our facilities.

The scope of projectONE focuses on Ambulatory Services where EMRs are currently in use in only a handful of clinics. By implementing EMRs throughout the outpatient setting and utilizing an enterprise master patient identifier (eMPI), UK HealthCare can connect the inpatient EMR with the outpatient EMR and provide a single, complete patient record accessible to care providers in any UK HealthCare facility.

The projectONE initiative actually has two components: the EMR and patient scheduling/registration. In May, the new UK HealthCare – Georgetown location was brought up on the Allscripts™ EMR in a standalone fashion. The first fully integrated EMR will be implemented in the Internal Medical Group early in January 2012, followed closely by the Digestive Medicine clinic and the Pediatric Cardiology clinic. In the meantime, the registration/scheduling component will launch this November.

“Next to the May 2011 opening of Pavilion A, the launch of ambulatory EMR is the most impactful project the enterprise has ever undertaken,” says Ambulatory Services Chief Operating Officer Jonathan Curtright. He added this is not based merely on the project’s eight-figure price tag, but also in terms of impact to every participant in the health care continuum of services.

In November Allscripts Practice Management will replace the RSS scheduling system, necessitating the training of more than 800 UK HealthCare employees involved with registration and/or scheduling.

The federal plan for EMRs requires three additional stages: computerization of provider order entry, electronic transmission of lab and radiology results, and providing patients with access to self-management tools. All must be accommodated by 2019 to avoid reimbursement penalties from Medicare and Medicaid. For more information about projectONE or to ask questions, visit the project website: https://careweb.ukhc.uky.edu/projectONE.
