

Pavilion A Building Design Guiding Principles

UK Albert B. Chandler Hospital

The planning of the new pavilion at UK Albert B. Chandler Hospital has, at every step, been guided by principles that speak to who UK HealthCare is and what we hope to achieve in providing the highest quality of care for the people of this region.

Those principles are:

Patient Access and Quality Care

This facility will provide a comforting and welcoming environment with the highest quality of care that is easy to navigate with amenities convenient to patients and their families.

Academic Mission

As we aspire to be a top 20 academic medical center, this facility must support patient-centered care around which our academic and research program can flourish.

Integration of Clinical Services

This building will support multidisciplinary care, integrating both its inpatient and outpatient services with adjacent facilities, providing a seamless care environment for our patients.

Efficiency

To provide the highest quality of care to our patients, this building must be operationally efficient, reducing unnecessary duplication and housing only functions most important to enhancing the care process.

Flexibility

The structure of this new facility will afford the opportunity to adapt spaces and technology easily in response to advances in medical treatment and growth of our services.

Image

Our new hospital will have a timeless design that is open and welcoming and provides a comforting environment for patients and their families.
