DARREN L. JOHNSON, MD

Chair

The Department of Orthopaedic Surgery and Sports Medicine is world renowned for developing and implementing state-of-the-art techniques to diagnose, treat, research and educate patients about bone and joint disorders. The department employs some of the only fellowship-trained surgeons in the region and features the latest technology and medical advancements. It is our goal to provide the highest level of care available so that we may return our patients to their daily activities as quickly as possible.

The UK Healthcare Sports Medicine Clinic provides evaluation, treatment, rehabilitation, and arthroscopic and reconstructive surgery for sports-related injuries. A multidisciplinary team of specialists treats professional, collegiate and recreational athletes.

Through Total Joint Service, a variety of comprehensive services to treat all musculoskeletal disorders and injuries are offered. The Center for Cartilage Repair and Restoration, the first of its kind in Kentucky, offers advanced treatment options including operative and nonoperative procedures. To complement the Center for Cartilage Repair and Restoration, we offer an advanced joint replacement and reconstruction program. The program was the first in Kentucky to offer the latest bone-sparing implants such as the Oxford® Unicompartmental Knee Replacement.
